CONTENTS OF VOLUME 44

PART 1 (March 1988)

A new probability model for determining exact *P*-values for 2 × 2 contingency tables when comparing binomial proportions . . . . . W. R. Rice 1
Discussion . . . . . I. D. Hill and G. A. Barnard 14
A criterion for determining the number of groups in a data set using sum-of-squares clustering . . . . . W. J. Krzanowski and Y. T. Lai 23
Regression trees for censored data . . . . . M. R. Segal 35
Statistical behaviour of the GMDH algorithm . . . . . D. G. Green, R. E. Reichelt, and R. H. Bradbury 49
Assessing partial influence in generalized linear models . . . . . A. H. Lee 71
Power/sample size calculations for generalized linear models . . . . . S. G. Self and R. H. Mauritsen 79
Bayesian inference for ratios of coefficients in a linear model . . . . . J. P. Buonaccorsi and C. A. Gatsonis 87
Tests and confidence sets for comparing two mean residual life functions . . . . . R. L. Berger, D. D. Boos, and F. M. Guess 103
Estimation of survival rates from a mark–recapture study with tag loss . . . . . W. K. Kremers 117
Distributional properties of the number of moves index of diversity . . . . . N. I. Lyons and K. Hutcheson 131
Estimation of interclass and intraclass correlations in multivariate familial data . . . . . M. S. Srivastava, K. J. Keen, and R. S. Katapa 141
The effect of pooling across strata in perfectly balanced studies . . . . . M. H. Gail 151
Models for the statistical analysis of infectious disease data . . . . . M. Haber, I. M. Longini, Jr., and G. A. Cotsonis 163
Estimation and comparison of changes in the presence of informative right censoring by modeling the censoring process . . . . . M. C. Wu and R. J. Carroll 175
Locally most powerful tests for detecting treatment effects when only a subset of patients can be expected to "respond" to treatment . . . . . W. J. Conover and D. S. Salsburg 189
Mixed Poisson likelihood regression models for longitudinal interval count data . . . . . P. F. Thall 197
Using the maximum test statistic in the two-period crossover clinical trial . . . . . A. R. Willan 211
One-sided sequential stopping boundaries for clinical trials: A decision-theoretic approach . . . . . D. A. Berry and C.-H. Ho 219
Sample sizes based on the log-rank statistic in complex clinical trials . . . . . E. Lakatos 229
Shorter Communications
On the analysis of categorical variables by linear models having singular covariance matrices . . . . . D. R. Thomas and J. N. K. Rao 243
A note on estimation using self-contained subsets . . . . . V. T. George and R. C. Elston 249
Paired Bernoulli trials . . . . . G. E. Dallal 253
Exact percentage points of the likelihood-ratio test for a change-point hazard-rate model . . . . . K. J. Worsley 259
How dependent causes of death can make risk factors appear protective . . . . . E. Slud and D. Byar 265
On confidence intervals for spatial parameters estimated from nonreplicated data . . . . . P. Hall 271
Properties of the geometric mean functional relationship . . . . . F. Barker, Y. C. Soh, and R. J. Evans 279
The Consultant's Forum
Effects of conditioning, swath structure, and weather on the drying rate of mown grass . . . . . C. A. Glasbey 283
Repeated measurement: Split-plot trend analysis versus analysis of first differences . . . . . J. L. Gill 289
Testing for linear trends in proportions using correlated otolaryngology or ophthalmology data . . . . . C. T. Le 299
Reader Reaction: Estimation bias using the beta-binomial distribution in teratology . . . . . D. A. Williams 305
Response . . . . . L. L. Kupper, C. Portier, and M. D. Hogan 308
Correspondence 311
Book Reviews 313
Corrections 321

PART 2 (June 1988)

Approximate interval estimation of the ratio of binomial parameters: A review and corrections for skewness . . . . . J. J. Gart and J. Nam 323

Deconvolution of episodic hormone data: An analysis of the role of season on the onset of puberty in cows ..... F. O'Sullivan and J. O'Sullivan 339
Attributable risk estimation from matched case–control data ..... S. J. Kuritz and J. R. Landis 355
Estimation of a common odds ratio in case–control studies of familial aggregation ..... A. Donner and W. Hauck 369
The asymptotic relative efficiency of the Mantel–Haenszel estimator in the increasing-number-of-strata case ..... W. W. Hauck and A. Donner 379
Modelling insect natality using splines ..... B. S. Yandell and D. B. Hogg 385
A distribution-free nest survival model ..... K. H. Pollock and W. L. Cornelius 397
Estimating tumor incidence rates in animal carcinogenicity experiments ..... G. E. Dinse 405
Effects of treatment-induced mortality and tumor-induced mortality on tests for carcinogenicity in small samples ..... A. J. Bailer and C. J. Portier 417
On adaptive *M*-regression ..... L. Yuh and R. V. Hogg 433
Jackknife estimate of the matching coefficient of similarity ..... J. F. Heltshe 447
Estimating the size of a population from a single sample ..... E. M. Laska, M. Meisner, and C. Siegel 461
Binomial and censored sampling in estimation and decision making for the negative binomial distribution ..... M. R. Binns and N. J. Bostanian 473
Evaluating the efficiency of the Δ-distribution mean estimator ..... S. J. Smith 485
On estimating the parameters of a bivariate probability model applicable to traffic accidents ..... H. Papageorgiou and S. Loukas 495
Significance testing for correlated binary outcome data ..... B. Rosner and R. C. Milton 505
Estimators and tests in the analysis of multiple nonindependent 2×2 tables with partially missing observations ..... J. M. Lachin and L. J. Wei 513
Bounds on net survival probabilities for dependent competing risks ..... J. P. Klein and M. L. Moeschberger 529
A model for agreement between ratings on an ordinal scale ..... A. Agresti 539
Characterizing activity-dependent processes with a piecewise exponential model ..... C. F. Starmer 549
Stability of genotypes in intercropping ..... M. Singh, B. Gilliver, and M. R. Rao 561
Shorter Communication
Fitting mixture models to grouped and truncated data via the EM algorithm ..... G. J. McLachlan and P. N. Jones 571
The Consultant's Forum
The *B*-value: A tool for monitoring data ..... K. K. G. Lan and J. Wittes 579
Fitting time-dependent multicompartment models: A case study ..... M. J. Faddy and M. C. Jones 587
Exploring simple independent action in multifactor tables of proportions ..... W. W. Piegorsch, C. R. Weinberg, and B. H. Margolin 595
The EM algorithm for maximum likelihood estimation in the mover–stayer model ..... C. Fuchs and J. B. Greenhouse 605
Reader Reaction: Estimating $\Pr(X < Y)$ in categorized data using "ROC" analysis ..... C. Brownie 615
Response ..... J. S. Simonoff, Y. Hochberg, and B. Reiser 621
Correspondence 623
Book Reviews 625
Correction 633

PART 3 (September 1988)

The prevalence of malaria in Garki, Nigeria: Double sampling with a fallible expert ..... J. Nedelman 635
An optimal design problem in rhythmometry ..... C. P. Kitsos, D. M. Titterington, and B. Torsney 657
Hyperparameter estimation using stochastic approximation with application to population pharmacokinetics ..... F. Mentré, A. Mallet, and J.-L. Steimer 673
A unified approach to variability in compartmental models ..... F. Ball and P. Donnelly 685
Testing for correlated errors in the analysis of variance ..... M. A. Cameron, G. K. Eagleson, M. E. Willcox, D. G. Laing, and H. Panhuber 695
Model selection and validation for yield trials with interaction ..... H. G. Gauch, Jr. 705
On the properties of maximum likelihood estimators of familial correlations under variable sibship size ..... R. Wette, M. K. McGue, D. C. Rao, and C. R. Cloninger 717
Confidence interval construction for parent–offspring correlations ..... A. Donner and M. Eliasziw 727
Confidence bands for logistic regression with restricted predictor variables ..... W. W. Piegorsch and G. Casella 739

Detection of migration using sound location ..... D. Ko and J. E. Zeh 751
Post-release stratification in band–recovery models
C. J. Schwarz, K. P. Burnham, and A. N. Arnason 765
A random effects model for binary data from dependent samples ..... M. Coffey 787
Exact inference for matched case–control studies ..... K. F. Hirji, C. R. Mehta, and N. R. Patel 803
Efficiency of balanced treatment allocation for survival analysis ..... L. A. Kalish and D. P. Harrington 815
A Bayesian approach to the design of Phase II clinical trials ..... R. J. Sylvester 823
Comparing the areas under two or more correlated receiver operating characteristic curves:
A nonparametric approach ..... E. R. DeLong, D. M. DeLong, and D. L. Clarke-Pearson 837
Estimating the power of the two-sample Wilcoxon test for location shift
B. J. Collings and M. A. Hamilton 847
Shorter Communications
An exact confidence interval for the relative potency estimated from a multivariate bioassay
D. A. Williams 861
The equivalence of two tests and models for HLA data with no observed double blanks
J. J. Gart and J. Nam 869
The Consultant's Forum
Multiple-set canonical analysis: An application to forestry genetics
P. A. Fernandez de la Reguera, F. H. C. Marriott, and J. Burley 875
Reader Reaction: Families of distributions for repeated samples of animal counts
J. N. Perry and L. R. Taylor 881
Response ..... A. W. Kemp 888
Rejoinder 890
Reader Reaction: Logistic regression for stratified case–control studies
N. E. Breslow and L. P. Zhao 891
Response ..... T. R. Fears and C. C. Brown 899
Reader Reaction: Testing in case–control studies with ordinal exposure variables ..... W. J. Shih 901
Response ..... J. Cuzick 904
Correspondence 907
Book Reviews 913
Corrections 923
The Biometric Society 925

PART 4 (December 1988)

Kalman filter analysis in dendroclimatology ..... H. Visser and J. Molenaar 929
HLA haplotype discordance ..... J. Green and M. Montasser 941
Power properties of the likelihood ratio test in an analysis of genetic diseases ..... N. C. E. Shute 951
An approach to the analysis of repeated measurements ..... P. J. Diggle 959
Growth curve models of repeated binary response ..... E. J. Stanek III and S. R. Diehl 973
A note on comparing growth rates of animals between groups ..... G. H. Brown and J. B. Donnelly 985
A lifetime asymptotic growth curve for human height
P. Jolicoeur, J. Pontier, M.-O. Pernin, and M. Sempé 995
Nonparametric methods for analyzing incomplete nondecreasing repeated measurements
C. S. Davis and L. J. Wei 1005
Markov regression models for time series: A quasi-likelihood approach ..... S. L. Zeger and B. Qaqish 1019
Correlated binary regression with covariates specific to each binary observation ..... R. L. Prentice 1033
Models for longitudinal data: A generalized estimating equation approach
S. L. Zeger, K.-Y. Liang, and P. S. Albert 1049
Incorporating prior information into the analysis of contingency tables
M. W. Knuiman and T. P. Speed 1061
Use and abuse of variance models in regression ..... J. C. van Houwelingen 1073
Small-sample confidence limits for parameters under inequality constraints with application
to quantal bioassay ..... M. D. Morris 1083
Using jackknife methods for estimating the parameter in dilution series
R. J. M. M. Does, L. W. G. Strijbosch, and W. Albers 1093
Kernel estimates of dose response ..... J. G. Staniswalis and V. Cooper 1103
Spatial and temporal analysis of disease occurrence for detection of clustering ..... R. F. Raubertas 1121
Seasonality comparisons among groups using incidence data
R. H. Jones, P. M. Ford, and R. F. Hamman 1131

On the use of concordant pairs in matched case–control studies ..... K.-Y. Liang and S. L. Zeger 1145
Power calculations for matched case–control studies ..... W. D. Dupont 1157
Models for the duo–trio and triangular methods
K. Mullen, D. M. Ennis, E. de Doncker, and J. A. Kapenga 1169
Bayesian methods for multiple capture–recapture surveys ..... P. J. Smith 1177
Shorter Communications
The use of a mixture model in the analysis of count data ..... V. T. Farewell and D. A. Sprott 1191
Simulated percentage points for the null distribution of the likelihood ratio test for a mixture of two normals ..... H. C. Thode, Jr., S. J. Finch, and N. R. Mendell 1195
